List of functions not working correctly:

Problem in Group:

1. If you open the bar of choosing class and remove a group, the bar for joining group will be clean. You have to refresh the page to get the correct data if that's situation happened
2. The first time you enter the page, you can refresh the page to get the list of the class correctly. For new register or log in user, it may happened that the list for user to choose may repeat several times.
