Sprint #2 Report

• 1StudyBuddy, 11/18/18

• Actions to stop doing: We are satisfied with our current process because we have regular meetings and we are solving problems constantly.

• Actions to start doing: The team should have more group coding sessions, since it is easier to assist other team members in person if they are having an issue with certain code.

• Actions to keep doing: The team should keep on having awesome scrum meetings, since this keeps everyone up to date and involved with the project. The team has been scheduling more meetings, since these are very effective at getting work done.The team should keep on participating on Slack, since it is a quick way to update your status and communicate with your team members. The team should keep having group coding sessions, since it helps member learn new material faster and easier, and it helps team members tackle issues together. The team should continue updating each other often (every other day) on what tasks we are doing so that no one's work overlaps another team members and keeps the team efficient.

• Work completed/not completed: The team has caught up from the unfinished work from sprint 2. Team has been able to add classes to user information. A profile page with data pulled from the database along with edit the information on the database and update information on the database. A group page where users can choose to join or create a group from the classes they've joined.

• Work completion rate:

Total# of User Story finished :3/3

Total # of work hour per team member: >20 hours

Total # of days : 14 days

Average User Story/Day = 5/14

Average Work Hour/Day = more than 2 hours
